EXPERIENCE

Premo Ventures — **Remote**
Product Lead — **June 2025 - Present**

- Co-authored the PRD for a multi-location dispensary analytics platform; mapped **6** personas and **20+** user stories, set acceptance criteria for MVP scope, enabling on-time delivery and improving sales and inventory reporting accuracy by **30%.**
- Engineered API integrations across QuickBooks, AeroPay, AlpineIQ, POS systems, and banking feeds to automate cross-system reconciliation and deliver real-time visibility into revenue, payments, labor costs, and inventory performance.
- Automated cross-system validation workflows, reducing manual reconciliation time by **4** hours per week and minimizing financial discrepancies across branches.
- Led end-to-end feature development from ideation through deployment, translating Figma prototypes into scalable Next.js components and managing sprint cycles in Jira, ensuring alignment between business goals and engineering execution.

Gray Acumen — **Remote**
Business Analyst — **May 2024 - August 2024**

- Conducted discovery through **5+** stakeholder interviews; defined problem statements and wrote lightweight BRDs that guided **5+** product enhancements, reducing operational friction by **30%** and accelerating feature delivery timelines.
- Identified and prioritized **7** major pain points, collaborating with engineering to deliver data-driven improvements that streamlined workflows and boosted efficiency, resulting in a **20%** increase in user satisfaction and stronger client retention.
- Presented product recommendations to stakeholders, securing buy-in and speeding up implementation cycles.

1-800-FLOWERS.COM — **Jericho, NY**
Software Engineering Intern — **June 2023 - August 2023**

- Drove accessibility improvements across **8** high-traffic pages by leveraging WCAG compliance tools, Magento, and Jira tracking; clarified requirements with designers and engineers, and successfully closed **100%** of P1 accessibility issues in-sprint.
- Collaborated cross-functionally to develop and present data-backed Gen Z-focused marketing strategy and trend analysis to the CEO and CMO, securing **1st place** in a company-wide competition by leveraging customer research and actionable insights.

Sarla Consulting — **Nassau, NY**
Technology Intern — **June 2022 - August 2022**

- Analyzed user feedback and partnered directly with **2+** clients to translate **10+** business requirements into Salesforce product flows, improving reporting efficiency by **25%** and enhancing data visibility for stakeholders across business operations.

TECHNICAL PROJECTS

Co-founder & Product Lead – Debtera — **Washington, DC**
GW New Venture Competition – 2nd Place — **January 2026 - April 2026**

- Led end-to-end product development from ideation to MVP, defining product vision, roadmap, and feature prioritization.
- Conducted **extensive customer discovery (100+ user interviews)** to validate problem-solution fit and refine core features
- Identified key user pain points and translated insights into actionable product requirements and user stories.
- Developed **market sizing, competitive analysis, and go-to-market strategy** for investor evaluation.
- Delivered investor pitch and product demo to VC judges, achieving **2nd place out of 200+ teams** and $7,500 in funding.

Co-founder & Product Lead – Uniflex — **Washington, DC**
GW New Venture Competition – Top 5 finalist — **January 2025 – April 2025**

- Co-led product strategy and MVP development, conducting **200+ user interviews** and synthesizing insights into product requirements and feature roadmap.
- Defined problem space, validated solution direction, and iterated features based on user feedback to strengthen product-market fit, presenting product vision and business model to VC judges earning top 5 out of the 200 + teams.
